I am currently listening to CNN, watching coverage on the "Obamacare" (properly called the Patient Protection and Affordable Care Act) ruling.

Aw yeah. I bought Fresh Fruit For Rotting Vegetables on vinyl the other day.

This sounds sweet, so I got hopes for this soundtrack...know absolutely nothing about the game.

I heard it on soundcloud - someone linked it with "DANTE

CONFIRMED FOR WUB WUB" and i thought they were joking and I opened it and i nearly pissed myself laughing.

They basically took all the cheesy and hilariously bad stuff from Devil May Cry and tried to make it 2edgy4u and the whole thing looks like a childish mess.

Some of their D&B stuff is...not bad, though.

Take My Bones Away, Baroness.

As far as I know, the game itself could absolutely suck. But I enjoyed the song.

I'm also digging what Muse is trying (even if it's sorta strange). I'm glad to see Muse didn't 'sell out' and don't seem to be releasing a generic album after how big they got with their last album, and still seem to be trying something 'different'. People are throwing a fit about them going "Dubstep" because they've heard one song that sounds Dubstep. The bands clearly said that they only have one song like that. But what makes me interested in it, is it's NOT played with electronics on the computer (mostly anyway), and is actually played on drums, guitar, and so on, and it sounds interesting, and I want to hear the full song.

Fearless, Pink Floyd.

we, unlike the bourgeoisie, have nothing to lose and therefore our expression will be the only honest one, our words will be the only challenging ones and our art will be the one revolutionary expression. We need new noise and new voices and new canvases to become something more than the last poets of a useless generation.
