I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Ugh, I'm so sick of people wanting bands to not evolve and stay within the same style forever. Bands SHOULD evolve, not stay stale and sound the same. It seems like so many people can't appreciate a band evolving these days, and just want them to continue recycling the same sound over and over again.
