The island of the Galapagos and the main power of South America controlling the West of South America. Militaristic and authoritarian with a troubled past and an uncertain future with stability at an all time low due to a lost war and unpopular occupiers.

The Squirrel-Gerbil Confederacy accepts the capuchins' entry into the Algerbil Alliance, which contains the SG Confederacy, Bobland, and the capuchins. Basquenland and Labrador keeps their independence but cedes St. Pierre and Miquelon to the Boblandians in a settlement negotiated by the capuchins.

Indochina invents a secret weapon with the plutonium deposits and genetic editing devices, as well as a particle accelerator loaded up with rubber, krylon spray paint, cotton cellulose and kevlar compounds to turn everybody into sussy amogus characters. They then attempt to turn themselves into impostors before a tibetan spy comes along with a dart gun and shoots the head scientist. He steps to the control panel and tries to revert the changes with his little scientific knowledge. He gets caught and gets into a massive shootout with the Indochinese patrol.
