I haven't played through the game, but those songs are just plain amazing on their own.

One of the best soundtracks ever.

This is why I love Youtube. Randomly stumbled upon this guy because one of the channels I'm subscribed to liked this video, and now I've found a lesser known artist who's awesome.

You should follow Theneedledrop to find new hip-hop. He likes a lot of hip-hop and reviews hip-hop albums all the time.

In fact, I could probably give you a list of his hip hop Albums of the Year pretty quickly.

A lot of us like at least the first 4 Metallica albums.

Jon Hopkins-Abandon Window.

I'm really not much of a dance music fan but damn I'm liking this album.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
