I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I strongly disagree with his opinion.

That Leraje one? Yes, it is a good song.

Kreator - Phantom Antichrist (live)

Going through Kreator's Dying Alive live album.

I guess he must have really high standards or harbor negative views towards himself. If I made a song as good as Pact with the Cosmos I would not think of it as "rubbish". :/

Fever Ray-Concrete Walls

It's fun trying to sing along to weird electronically-enhanced deep vocals...and, you know, being a male singing along to a song sang by a female.
