Linkin Park - Crawling

So far this album hasn't been terrible but not all that interesting or good either.

I can see why you'd hate this album. It's pretty boring and doesn't really go anywhere. And that's coming from *me* who usually goes "I like this 10/10" ☐

Linkin Park - In the End

This sounds exactly like a song I'd hate but for some reason I love this...

I feel like your list of "1001 must listen to albums" will lead you to  
Green Day at some point, Cadonica....

I can dig the sound but for me the biggest let down with Green Day has always been the vocalist, I don't like his voice at all.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
