How To Dismantle An Atomic Bomb was ok, but it seemed dull compared to U2's older albums.

Holy Fuck-K. Rhythm (Part 2)

Album gets kinda repetitive, but it's rather good overall. 8/10. And really, repetitive under certain circumstances isn't exactly an issue to me. It's weird, I hate repetitive pop music, but there's a lot of repetitive, slow plodding music, and music like this and Swans, that don't bother me at all for being slow and plodding.

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
