Going old school Sigur Ros. There's about 3 songs I know best on this album that I quite enjoy, and this is one of them.

Pink Floyd - "Any Colour You Like".

I love that "dueling guitars" effect, y'know what I mean?

Call me Phoca.

Devin Townsend Project - Deconstruction

Possibly one of the greatest songs in existence.

That's one of my major focuses in the metal realm, is that project. That projects pretty insane because he released a ton of albums really quickly. Kinda like Death Grips with their 2 albums within 6 months of each other.

It is definitely interesting, but I could see why someone wouldn't like it. You have to go into it with an open mind.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of

evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
