Master of Metal - I Killed a Girl

Piano parody of I Kissed a Girl.

*I killed a girl and I liked it  
The taste of blood on my hatchet  
I killed a girl just to try it  
I know my minions won't mind it*

*It felt so wrong, it felt so right  
And now you'll be killed tonight!*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All

that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
