Robots shouldn't have rights or citizenship;
Compromise on other non-human sapient entities is possible, with limitations, but not on these buckets of bolts. They should serve humanity and have absolutely no place in society other than as our servants. Think of the benefits of this. Plus, they would almost certainly overtake humanity if we gave them the chance, whether out of pure advanced abilities or malice, or worse, both. Think of humanity.

Humanity First!

tell me you have no clue how artificial intelligence works without explicitly telling me...

U.S.S. UNITED STATES (CVA-58) "GONE, BUT NOT FORGOTTEN"

□ □ □ □ □

Intended as the first of a new class of "supercarriers" for the United States Navy under the administration of President Harry S. Truman. Her design was notorious for lacking an island superstructure and its unconventional deck layout, which would not be seen in the succeeding Forrestal-class.

In 1949, only five days after United States' keel was laid down, she was cancelled by Secretary of Defense Louis A. Johnson as part of a campaign to cut down the naval budget and advance the development of airborne nuclear deterrence via long-range bombers.

Closing the gap in my age: 15-17

Normally I would guess 16, but since that seems to be kind of an obvious answer you'd want me to guess, and as your account was formed in 2021, I'd guess 17.
