Swans-Screen Shot

Couldn't figure out what I really felt like listening to/going through, so selected this to listen through thoroughly again. This days going to be a lame day for music listening because I've felt sleepy as hell all day.

Unless you're fighting for your religion of course!

Or your country.

I think half the time the biggest sinners are people who go around preaching about sinners being everywhere.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
