I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Mogwai-Summer

At this rate, I doubt I'm going to make it in time to finish all all the EP's...surprisingly close, but yeeeeaaaahhh. I have literally 2 days.

Stays up late listening to stuff

Also the fact these are two compilation albums I'm listening to now, not EP's...Thought they were.
