Monkey 2081 went to Brazil

What this thing is:

A nation obsessed with technology and progress populated by various types of mad and villainous scientists. They're not evil, of course, it's just the aesthetics of it. Well, some of them aren't scientists either - those less academically talented generally find their calling assisting their master employer with their scientific endeavours (hump or other physical deformity not mandatory).

The faces of this thing:

Monkey 2069 was having some... fun... in an alleyway on Coruscant when some random purple lightsaber fell on his head. It landed hilt-first, but, at that speed, it hardly matters.
