Fabulously **bisexual**.

Note: I do not use NS stats for my RP, instead I use numbers I made up one evening when writing my factbooks.

Tyler the creator -she
The blinds are open so he can
See you in the dark when you're sleepin
Naked body, fresh out the shower
You touch yourself after hours
Ain't no man allowed in your bedroom
You're sleepin alone in bed, check ya window
(swag)
He's at ya window

Eric B. & Rakim – Don't Sweat the Technique

*They wanna know how many rhymes have I ripped and wrecked
But researchers never found all the pieces yet
Scientists try to solve the context
Philosophers are wondering what's next
Pieces are took to labs to observe them
They couldn't absorb them, they didn't deserve them
My ideas are only for the audience's ears
For my opponents, it might take years*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
