[Chris Hadfield-Space Oddity \(Revised David Bowie song\)}](#)

This neat video is going around the Internet today. Chris Hadfield is one of the Canadian astronauts aboard the space station (or was, he came home today), who took amazing photography from space. He also put out cool videos for his fans based on stuff people wanted him to demonstrate, to see how it behaved in space. Now yesterday hew threw out this. which is pretty awesome.

Spacing F'ing rules. I seriously hope before I die there is affordable space travel, so I can at least see Earth from space. It would instantly go on my bucket list of things to do.

Tragedy - *Revengeance*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
