Monkey 4153 switched places with Charles I of England. Now we're stuck with a monarch who is supposed to be extremely dead.

Monkey 4152 bought a Samsung Note 7 when it came out. He went on a plane, and during the flight it exploded and took down the plane. He survived though, and was left stranded on a deserted island. He was rescued by a ship, but that ship sank due to an iceberg and he was left in the middle of the ocean with only a raft. He swam to another island with people, who immediately killed him for food.
