I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I've listened to two of his albums and I'm about halfway through another one. He's definitely one of my favorite rappers, there isn't much of his stuff that's not really good.

Lupe Liasco's "I Gotcha" reminds me of Super Mario Bros. ☐

☐ You know, I was trying to figure out why that song sounded familiar...now it know what it is. ☐

Since I like this gem by Ludacris, and I enjoyed Lupe Fiasco's take on Super Mario Bros, do you have any suggestions for me?
