Hey so did you know their black market is actually state sanctioned and actively used by the state to procure untraceable supplies

I still remember.

Also their empress began her reign with a prompt execution-spree within the upper echelons of government. Following tradition, I see.

Their leader gets up very late in the mornings, presumably because he spends his nights going on walks, and while he doesn't eat much during the day, he more than compensates by stuffing himself with cake in the evenings. This habit of his is starting to give him a bit of an unsightly figure.

Their current high captain didn't really get into power by any sort of leadership merit - he mainly just stole things. Which kind of makes sense for a pirate, I guess.

The Black Legion, the primary fighting force of Eisenstern, has *nine million* troops in reserve, while its active forces are potentially infinite (given they're essentially golem drones, that makes some sense). One would ask, why do they even have a reserve if their active troops are potentially infinite?

Because short-term storage of trillions of golems can get a bit problematic, and the Guild got tired of having to stretch the city just to fit more golems into it.

That Alicia overruled the courts of law and executed senators after her father died. He had a dying wish to confront them it seems. Otherwise, some people consider Alicia to be a tyrant while other do not. It's a matter of perspective from outsiders and people on the inside. She inherited an already totalitarian country but she seems a bit more open minded.
