Monkey 2018 was sniped while speeding down a specific highway.

This is indeed, once again, a signature.

God, you people need to pay attention. If nothing else, count the monkeys from my most recent post in the thread. I do a recount from my last post every time I post here.

Since too many people returned to monke, there was not enough food to feed the population, so monkey 2026 starved to death.

What this thing is:

A nation obsessed with technology and progress populated by various types of mad and villainous scientists. They're not evil, of course, it's just the aesthetics of it. Well, some of them aren't scientists either - those less academically talented generally find their calling assisting their ~~master~~ employer with their scientific endeavours (hump or other physical deformity not mandatory).
