I refuse to illegally download anything to play on Audiosurf, though.

Meh, I don't stress that much. I have 12 225 songs on pc right now, roughly 30-40% is downloaded, the rest is owned either by me or my friends. Or copied from albums I've borrowed from library >.>

But I have NOT downloaded/copied anything just to play them on Audiosurf.

NOFX - PMRC Can Suck on This!

I have the whole EP as one file. The songs: Dueling Retards; On The Rag; A200 Club; Shut Up Already; The Punk Song; Johnny B. Goode

EDIT: And that downloaded stuff percentage is going down all the time as I buy the stuff I've downloaded.

Neurosis - *A Chronology For Survival*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
