Scar Symmetry - *The Spiral Timeshift*

This album was good the first time I listened to it, but now that I'm paying more attention to it the second time around, it's *so much better*.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I don't listen to Lana Del Rey nor the song, but I read over the lyrics and I liked them.

Her music isn't for everyone. She's widely criticized as an artist for a variety of reasons. I still love her though. Maybe give her a listen and hear what she's all about?

Hilariously cheesy. Cadonica would probably love this.

I had completely missed this. I indeed do love that song.

Vindicated, I am selfish, I am wrong, I am right. I swear I'm right, swear I knew it all along.
