All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Kiryu - Oirantan

My favourite visual kei song. I do like how the singers in visual kei are always so pretty.

Seremedy - No Escape

This is a close tie for my other visual kei favourite. I'm not sure if Seremedy counts as that since the band is Swedish, but the singer is quite ridiculously hawt so I suppose it does count. A lovely voice too.

Maybe I should give black gothic a try since I keep drifting between black and gothic to get my music fix.

This band is somehow unsigned. ./

That doesn't make sense considering how good of a black metal band Mistur is.

I'm hanging on to consciousness, by the power of melodic black metal. Listening to songs I rate as 11/10 helps.

I should really only stay in A&F when I'm sleep deprived. I don't like my unstable behaviour.

Every time I get warnings it's when I'm sleep deprived. ☐ It seems to affect my stability.

I miss old Dimmu Borgir.

I haven't been warned before but I think lack of sleep has affected me before, too. I guess it is reasonable since it is common thought that lack of sleep causes people problems.

I just typically stay away from the endless abortion, religious, and so on threads in general. I can usually tell by the thread title when a thread will probably make me angry so I just try to avoid making my anger go up by staying here ☐
