I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Nas – Life's a Bitch (ft. AZ)

[AZ:] *Visualizing the realism of life in actuality*

Fuck who's the baddest, a person's status depends on salary

And my mentality is money-orientated

I'm destined to live the dream for all my peeps who never made it

Cause yeah, we were beginners in the hood as 5 Percenters

But something must've got in us cause all of us turned to sinners

Now some rest in peace and some are sittin' in San Quentin

Others such as myself are trying to carry on tradition
