Friends of Dean Martinez-White Lake

Been listening to music with crappy headphones for days now. Been kinda doing that because I hate using my speakers when my doors open, and I've been having my door open lately because it has been too hot to keep myself enclosed in my room. But with my door open, I have lots of background noise, like other peoples music. And I'd rather not blast music into the rest of the house that people have to deal with, either. So I've decided to just use headphones instead, because it blocks everything else out for others, and myself.

Now all I need is a real pair of headphones. I broke my cheap pair by repeatedly getting tangled up in it I think while watching shows and yanking on them (Because I'm dumb like that when using the laptop on my bed), which sucks because I barely had time to use them, though I did use them a lot during that short period of time. Now I'm just using some other pair we got a while back. But I still want a real nice pair of headphones.

Dimmu Borgir - *Moonchild Domain*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
