### Sabroso - Sos Todo

*Me decís que ando en otra que me gusta la parra que todo me alborota  
que si voy que si vengo que si no tengo clase pero eso no importa  
para estar a tu lado si no me histeriqueas y no das tantas vueltas  
te aseguro mi vida que si te caben dudas yo te bajo la luna  
sabes que no es chamuyo. yo aquí dejo mi orgullo y te digo de una*

*si si te quiero yo si te quiero, te adoro mi vida sos todo  
si si te quiero yo te re quiero, mi vida mi bello tesoro  
si si te quiero yo si te quiero, te adoro mi vida sos todo  
si si te quiero yo te re quiero, mi vida mi bello tesoro*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
