"Mr. Hatlen is someone who reminds me a bit too much of Zen. He's probably a lot nicer than the one I know, so there's that...but what's this about all he accomplished? A perfect barrier that stops all physical contact of any kind? I wish I had something like that! Maybe I could one day...but Serry definitely wouldn't like that! Physical contact's nice! What happens when you cross anime powers and overpowered leaders with furrries, all written by a bored Homestuck fan with too much time? Well, you get Rumei. A multiethnic, FT republic with both might and magic that let it conquer the entire Orion Arm.

A 7.6 (this is probably outdated but I can't do the calculations rn) (Tier 9, Level 6, Type 9) according to [this index](#).

Come to The Orion, we got [CULTURE](#) and [FURRIES](#)

Show Recommendation: Cobra Kai. It is very, very good.  
IC Name: Roman Republic, or simply Rome (Rumei). Occasionally called the Ignisian Republic. Current year is 2697.

"Well, in comparison to the other sultan from Deccan clan, this one has less info on them, so there's less to make an opinion on. Anyways, from what I can gather, he is quite old already, and not in his best years. You need an additional tool to see? I understand - our own elder cat vision can get worse over time. So far, most of his hobbies seem to be related to something musical, or hanging out with the rest of the clan members - pretty average and okay, I say. And I see that he is a simple man, and doesn't want much pomposity - from one side it is beneficial, as the clan leader can be addressed with little formality, but from other side you must also not get too deep with the whole "man of the people" thing, and clearly distinguish yourself from other clan members."

"The so-called temporary dictator of Xaviet? A young rising star in the empire's political stage, that Wilhelm. The only thing I admire about him is his uniform. Sharp and fancy. Honestly, I believe the young man is more suited to be a soldier, out in the battlefield, not leading his country into a potentially dangerous hole it wouldn't be able to climb back out of."
