An extremely small gun which automatically shoots a version of itself with the same properties but ever so slightly bigger. Eventually you end up with a gun sufficiently large so that the problem is solved.

Hi, it's been a while. If you're seeing this then it means what I'm working on is not quite done yet. You can still read my old stuff but it's probably not canon anymore. I'll try to get something up soon. It may or may not involve wizards.

Defining the gun's launched gun's size as l and editing another gun's ontological properties so its size is $l + 1H_l$, thus meaning that my gun will always be bigger than yours.
