Indeed - anything that AN has ever typed anywhere public on the site is fair game for this thread, so far as I'm aware.

Daughter nation of [The Unified Provinces of Rhanukhan](#), originally created during the course of roleplay events back in 2008 (a "live" summarised replay [is currently unfolding here](#)). The accounts relating to it in Rhanukhan's own factbooks are deliberately vague as the people of Rhanukhan are unaware of many details regarding the island. As such I've established it as a separate nation in order to provide greater insight through its own factbooks.

"Contained in the salivary glands of the GBI-1 is a complex organic chemical we call CBV301 developed by our head scientist, Professor Beatrice Wardrobe - who sadly can't be with us tonight, which shares many genetic traits with the GBI-1 itself. Once admitted into the bloodstream of a victim, it swiftly attacks the nervous system and progresses rapidly to the brain where it erases the higher brain functions, supplanting them with a copy of the GBI-1's current instructions and training. Et voila - instant loyal new trooper! Over the course of the following 24 hours the CBV301 reworks the rest of its target's body, enhancing bone, muscle, organs and of course, the signature yellow skin - creating a brand new GBI-1! Our free gift to you - GeneTech's valued customer!"

Congratulations, you have made a new nightmare for me.  
That's actually terrible...
