Your nation is like a son. What it does right is your merit, as well as what it does wrong is your fault. When you praise it, be lucid and avoid exaggeration. Praising it too much can make it indolent. On the other hand, when you criticize it, be harsh, but do not ridicule it. Do your best to improve it, not through derision or disdain, but through good examples and dedication.

I still can't get into that album. The first two are so much better to mine ears.

[The Problem Is - Murs ft 9th Wonder ft Sick Jacken](#)

Sick Jacken's verse made this song

*Lemme start with what I know, and lemme put in this flow
We got all the guns we need but no money to grow
We got all the coke and weed but got no profits to show*

*Junkies got a teen(?) of speed but they brain is moving slow
Education at an all time low
Still catch an all time high, off the kush Dr. green thumb grow
I ain't preachin' I'm just givin' you a real twenty-fo'
It's a cold world these streets don't feel anymo'
There's no way of tellin', what turns rebellin(?) streets to three time felons
Or people's government to big time villians
Rob us blind, stealin'
Just the way it is
Take you for a gang of loot for \$20 got you out here slayin' kids
Now tell me why is that
They blame the lies in rap
But what about the medium bullshit, they disguisin' that
How we got access to ammo and any size of gat
But we don't got any decent schools for us to knowledge at
It's called applied malice
They know they turn us into crime addicts, on the block, chasin' superficial status
Now do the mathematics, how many of us die in war, on the street or for all who seek and score
The same cops we pay to protect us serve us
And the country turns it's back even though you fought for it in service
When it comes to my life it's never one problem
You never know about it til you walk the shoes that I'm in*

"what I believe is like a box, and we're taking the energy of our thinking and putting into a box of beliefs, pretending that we're thinking...I've gone through most of my life not believing anything. Either I know or I don't know, or I think."
- John Trudell

All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
