### How do you interpret AN's primary banner?

**QUOTE**

by **LimpBizkit** » Sat Sep 30, 2017 6:42 pm

see title. be nice.

The Creeping Barrage is the name given to a method of firing artillery. At the beginning of Trench Warfare the basic tactic was to fire lots of artillery at enemy trenches for a sustained period of time and to stop firing just before the infantry attacked. However this method wasn't very successful as the German had built strong bunkers and were able to man the defences in the time between the bombardment ending and the infantry getting to the trenches. A solution to the problem of the time lag between the bombardment and the arrival of the infantry was to change the way that the artillery was fired. Instead of just aiming at the same target the creeping barrage moved forward at a prearranged pace.
