CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

How long is "long"? I don't think any song can be considered long to me anymore after some of the stuff I've heard ☐

You wouldn't call it long. It's 9 minutes. But it seems kinda boring. That's what makes it long.

That's a decently long song, though. I remember thinking that was extremely long. Hell, I thought Glosoli by Sigur Ros, a 6 minute long song, was long back in the day. That song isn't even the longest by Sigur Ros standards.

But now I have a playlist that has 126 songs in it that are over 10 minutes long, the longest being a 49 minute long song.

I found one of Shakiras number one hits years before she started singing in english and compromised her music style for big bucks.

This was Shakira at her best. I think she wrote this song.

Official Video song - <http://www.youtube.com/watch?v=eCna-hsmGUY>

Non-official video song, only shows her photo, but with English subtitles for the song.
