I think it might be my favorite by them, to be honest, even if it is more 'repetitive" then their other stuff. I like everything I've heard by them, I just like this one more overall for whatever reason.

Venetian Snares - *Underground Circus Jesus*

“ CVT Temp [wrote](#):
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
