Napalm Death - *Mass Appeal Madness*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I was listening to Feed Me by Little Shop of Horrors, but then my Internet pooped.

Now listening to Grow for Me by Little Shop of Horrors. Little Twoey is so cute! Too bad he grows into a man-eating plant that could eat a human whole.

"It's swell though they tell me I'm maladjusted!" ~Orin Scrivello DDS from Little Shop of Horrors
