U2 - Mysterious Ways

From *Achtung Baby* (1991)

*Johnny take a dive
With your sister in the rain
Let her talk about the things
You can't explain
To touch is to heal
To hurt is to steal
If you want to kiss the sky
Better learn how to kneel (on your knees boy)*

*She's the wave
She turns the tide
She sees the man inside the child, yeah*

*It's alright, it's alright, it's alright
She moves in mysterious ways
It's alright, it's alright, it's alright
She moves in mysterious ways
It's alright, it's alright, it's alright
Lift my days, light up my nights*

Impossible is just a big word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. Impossible is not a fact. It's an opinion. Impossible is not a declaration. It's a dare. Impossible is potential. Impossible is temporary. Impossible is nothing.

U2 - Elevation

From *All That You Can't Leave Behind* (2000)

*A star lit up like a cigar
Strung out like a guitar
Maybe you can educate my mind
Explain all these controls
Can't sing but I've got soul
The goal is elevation*

*A mole digging in a hole
Digging up my soul now
Going down, excavation
I and I in the sky
You make me feel like I can fly
So high, elevation*

blind guardian - noldor (dead winter reigns)
genre: power metal
album: nightfall in middle-earth
concept album about the silmarillion
so, the album is one big spoiler ☐

Leonard Cohen - Nevermind

From *Popular Problems* (2014)

*The war was lost
The treaty signed
I was not caught
I crossed the line*

*I was not caught
Though many tried
I live among you
Well disguised*

*I had to leave
My life behind
I dug some graves
You'll never find*

*The story's told
With facts and lies
I have a name
But nevermind*

Bob Dylan - Full Moon and Empty Arms

From *Shadows in the Night* (2015)

*Full moon and empty arms
The moon is there for us to share
But where are you?*

*A night like this
Could weave a memory
And every kiss
Could start a dream for two*

Elton John - Home Again

From *The Diving Board* (2013)

*If I could go back home, if I could go back home
If I'd never left, I'd never have known
We all dream of leaving, but wind up in the end
Spending all our time trying to get back home again*

*Could have been a jailbreak and the spotlight hitting me
Or was I just some nightclub singer, back in 1963*

*In the old part of Valencia, on the coast of Spain
Never tiring once of hearing songs about going home again*

Paul McCartney - My Brave Face

From *Flowers in the Dirt* (1989)

*Ever since you went away I've had
This sentimental inclination not to change a single thing
As I pull the sheet back on the bed
I wanna go bury my head in your pillow*

*Now that I'm alone again
I can't stop breaking down again
The simplest things set me off again
Take me to that place*

*Where I can't find my brave face
Where I can't find my brave face
My brave, my brave, my brave face*

U2 - The Troubles

From *Songs of Innocence* (2014)

I have a will for survival

So you can hurt me

And then hurt me some more

I can live with denial

But you're not my troubles anymore

Somebody stepped inside your soul

Somebody stepped inside your soul

Little by little they robbed and stole

Till someone else was in control

Somebody stepped inside your soul

Somebody stepped inside your soul

Little by little they robbed and stole

Till someone else was in control

Coldplay - The Scientist

From *A Rush of Blood to the Head* (2002)

*I was just guessing at numbers and figures
Pulling your puzzles apart
Questions of science; science and progress
Do not speak as loud as my heart*

*Tell me you love me
Come back and haunt me
Oh and I rush to the start
Running in circles, chasing our tails
Coming back as we are*

*Nobody said it was easy
Oh it's such a shame for us to part
Nobody said it was easy
No one ever said it would be so hard
I'm going back to the start*

Entrails - *End Of All Existence*

CVT Temp wrote:
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
