Yeah, they are pretty bizarre, but they're so hilarious that it makes it one of her best songs. ☐

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I'm listening to a unreleased demo CD from a defunct local cover band named "Rattle Trap". One of my co-workers was the lead guitarist. It is a 5 track disc and contains covers of the following songs:

Balls to the Wall
Pet Cemetery
Ballroom Blitz
Pretty Vacant
For Whom the Bell Tolls
