I have massive carrier fleets, but luckily that is part and parcel of being in NS FT.

Should've been more specific, in MT and PMT

I have two carriers while having a 2,8 million population with one of the carriers being a fleet carrier. Is this under your definition of absolutely large carrier?

Kind of? I mean moreso the smaller nations that have carrier fleets the size of naval superpowers like the US

(Not bringing in the current drama but talking in general here)

The *real* cliché is people who think more than a small percentage of the already small userbase of this game who actually use the forums care about moderation drama or 'corruption'.

Every single thread involving NS drama always devolves into a small group of users (usually no more than 10 or so) arguing in circles for like 15-20 pages before the thread either:

- Gets locked for going too far off the rails for whatever the original drama was
- Just dies normally in a few days as most of the users realize that they're getting way too invested in a goddamn mediocre internet site and decide to do something actually productive and just play the game as normal.

And let's not forget the types of players you get in these threads, my favorite are the 'If the mods don't implement all these changes I have come up with exactly as I have written, then I *guarantee* the playerbase *will* leave this site in DROVES and this site will end up dying and shut down!' ones tbh.

I can see myself leaving NS, if only one of these possibilities happened:

- The site suffered an irreversible and massive data loss that involved the nations and its stats. I know most people don't use NS Stats, but don't touch my precious stats, man. 🤔 I have contingency plans and backups, but only my writings will survive, not my nations. I love my numbers.
- The site suddenly allowed M18+ and NSFW stuff. Don't get me wrong, I am not a prude, but I would also love to stay in the territory of PG-13 for the most parts.
- I died.

As much as I too like to question actions of both players and moderation actions alike, but... eh, I don't see a lot of things that would make me leave the niche community we have here, kinks and all. ♥

The real NS cliché is this thread

Republic of Northumbria

"I don't think it's too much of a concern. Apparently both of the people who died had existing health problems."

Bede kinnie — Catgirl appreciator

"The amazing thing is that Tony Blair being shot in the head after running a barricade for inexplicable reasons is one of the most plausible episodes in this RP, which comes across as House of Cards by the writers of Mr. Bean."

That would probably count as "the site suffering an irreversible and massive data loss"

What this thing is:

A nation obsessed with technology and progress populated by various types of mad and villainous scientists. They're not evil, of course, it's just the aesthetics of it. Well, some of them aren't scientists either - those less academically talented generally find their calling assisting their ~~master~~ employer with their scientific endeavours (hump or other physical deformity not mandatory).

The faces of this thing:

[Vice Archbrain Metron Vektorin](#)

This nation or its characters are not intended to represent my social views, or political views in their entirety (although I am a supporter of technocracy)

Nah, if that happens, just fire the entire Internet towards... somewhere into space. The Internet will live somehow, trust me.

THE PEOPLE * ETERNAL

" We will not bow to your dictation. We are free. We bled to be free.
Who are you to tell us what we may and may not do? **We stopped being your slaves an era ago.** "

In the midst of a room-temperature cultural revolution that's lost its momentum, the Party carefully plans its next move. I would hold you in contempt of FT if you didn't throw them at people if you had them available.

If an FT nation lets themselves get hit by a Chicxulub they frankly deserve it.

Waste of resources anyway. Just get a battleship to sling a couple million tons worth of MIRVs at a planet and you'll impart the same energy over a much
