I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Scarface – Mind Playin' Tricks 94

*The world is endin' so they try to make us switch fast  
And they openin' up these churches for some quick cash  
And usin' the money fo' they new cribs  
While brother Johnson just got kicked out where he lived  
I follow no man, cause man be phoney  
My mind was playin' tricks on me*
