I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

[Dinosaur Jr - Green Mind](#)

Your nation is like a son. What it does right is your merit, as well as what it does wrong is your fault. When you praise it, be lucid and avoid exaggeration. Praising it too much can make it indolent. On the other hand, when you criticize it, be harsh, but do not ridicule it. Do your best to improve it, not through derision or disdain, but through good examples and dedication.

They want the threads locked at 500 pages for storage or memory problems or something, I don't remember exactly.

Stars of the Lid-The Atomium (Part 1)

This is the kind of ambiance I love. This whole band seems pretty solid, though the first one I heard is probably still my favorite.

"Natural Science"--Rush

Check my quotes for some of Neil Peart's best ever lyrics in this song. At least, one of my favorites that is.
