Torture Killer - *A Funeral For The Masses*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I like that song...

Queen- Sweet Lady

Possibly the worst song from the album A Night at the Opera, but it's still cool. ☐

Was curious since I've never heard of them before, so I checked them out on Youtube, now my ears are bleeding. I think I'd rather listen to my busted cpu fan ☐

Nightcore isn't even a group; it's just this fad of taking existing songs and remixing them to make them faster and bubblier.

Yeah I realized that afterwards, though it was a bit confusing because there was an actual group named nightcore with a myspace page and everything ☐

And just so I'm on topic: The damn cpu fan again, can't wait to get paid so I can replace it. Also the bgm for Romance of the Three Kingdoms 11.

immigrant song, led zeppelin.

live, from 'how the west was won'.

we, unlike the bourgeoisie, have nothing to lose and therefore our expression will be the only honest one, our words will be the only challenging ones and our art will be the one revolutionary expression. We need new noise and new voices and new canvases to become something more than the last poets of a useless generation.

I had to replace my power supply relatively recently. For the longest time, it would make lots of noise, then stop making noise. It hung on like this for 2 to 3 years, before it finally did that one time and crapped out. Like, I turned off my computer, and it barely came back on when I turned it on again. Fun times...

I lied. Not listening to King Animal (and didn't in the intervening hours. Currently listening to Chris Cornell's "Songbook" live solo album. Good stuff - amazing voice. I know there are many that would disagree, but I can't get enough of his voice...

EDIT: Poster above is listening to Zeppelin, and I just got to a Chris Cornell acoustic cover of "Thank You". Fkyeah :)
