Always use black outlines for the shape of the ball and eyes, but not the inside of the flag.  
Unless there is some force applied on the ball, the shape should be wider than it is tall, but not to the point that it is just a line. And if your ball is not made of metal or plastic, it is best not to use that kind of shading. I would suggest a "crescent-like" shading. Also on shading, make the darker shade take around 20%-40% of the countryball, but it can change depending on the lighting.

Daughter nation of [The Unified Provinces of Rhanukhan](#), originally created during the course of roleplay events back in 2008 (a "live" summarised replay [is currently unfolding here](#)). The accounts relating to it in Rhanukhan's own factbooks are deliberately vague as the people of Rhanukhan are unaware of many details regarding the island. As such I've established it as a separate nation in order to provide greater insight through its own factbooks.

The end of the world has many factors, depended on situations that happens.

Some situations that would end the world:

- All NS nations suddenly become real countries
- Schrodinger's cat says: "baaaa"
- Naked singularity wears his clothes

I just wanted to state that i'm **NOT** a communist, nor a socialist. I just want to experiment with this country.  
I also wanted to state that my pride flag was made by Almonaster Nuevo.
