Lindsey Stirling is a good violinist.

And I totally have a crush on her, but that's another story.

I don't even think she's the best violinist or anything, either. Secret

Chiefs 3 violinist and another name that comes to mind are two I think of that are better. It is the fact that she plays violin AND does all those crazy dance moves at the same time that is so impressive.

People go and say "But it's just for the videos!", but she does it live, too.

People should do some research before they open their mouths, really.

Her videos are generally interesting, as well.

I have like, 15 songs over 10 minutes long I need to listen to. That's over 2 hours of music in 15 songs. But I'm not in the mood to go through the massively long songs right now.

So I go with massively short

Deerhoof-The Tears and Music of Love

These guys are the 5th band on Last.fm of mine to hit over 100 scrobbles. Which is weird because there's been a band sitting at 96 for like almost a year now. Only recently it went up to..98.

It also helps that a playlist with 90 of their songs is only 4 hours long, so you can add it up fast...

C-Mon & Kypski - *More Is Less*

CVT Temp wrote:
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
