The Black Keys-The Flame

The Black Keys are definitely one of those bands I only really sorta like. This albums mostly boring me.

Still will probably buy all of these albums for my grandpa at some point. It totally fits into his style of stuff he likes.

Driver: San Francisco had a very varied soundtrack of bands, even if I didn't care for most of them.

Kind of like Saints Row: The Third and Grand Theft Auto V. All varied, but not something I generally care for.

Kronos Quartet-El Sinaloense

Narrowing down my neoclassica/contemporary classical/minimalistic/piano music quite a bit today alone. Then I move onto some drone, doom metal, and drone metal type of stuff by Earth and Boris.

Zimmer's Hole - *Fully Packed*

“ CVT Temp **wrote:**  
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
