I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Blood on the Dance Floor-I'm What Dreams Are Made Of

I'm so lush,
I'm everything you want.
I'm your fantasy...
I'm What Dreams Are Made Of!
You want me.
Can't resist me...
You know that,

I'm What Dreams Are Made Of

Only one Hungary. Only one Homeland!

Dude wrote a whole album with the intent of getting his wife back...he even named the album after her.
Not only is that extremely stalker-ish, it's also pretty pathetic...

Yeah...And I'm pretty sure those lyrics aren't convincing anyone.

I know a song that is pretty much supposed to be a stalker song intentionally.
