This is the reason why I have lost faith in humanity.

No, no, no, no, no, no, no, no...hell no.

Why does this exist!? -_-

I need to cleanse my ears after that...

Elton John - The Last Song
From *The One* (1992)

*Things we never said come together
The hidden truth no longer haunting me
Tonight we touched on things that were never spoken
That kind of understanding sets me free*

*'Cause I never thought I'd lose, I only thought I'd win
I never dreamed I'd feel this fire beneath my skin
I can't believe you love me, I never thought you'd come
I guess I misjudged love between a father and his son*

Impossible is just a big word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. Impossible is not a fact. It's an opinion. Impossible is not a declaration. It's a dare. Impossible is potential. Impossible is temporary. Impossible is nothing.

Darkthrone - These Shores Are Damned

*Seeking fortune on these shores
I ridicule your hopes
Parasite in the realm
To be wiped away*

*You're doomed in that valley
Raised cages of cold
Wait for the next wave
I welcome these empty shores*

One of my favorite Darkthrone songs.

Elton John - Levon
[Live performance, November 15, 1996](#)

*Levon wears his war wound like a crown
He calls his child Jesus
'Cause he likes the name
And he sends him to the finest school in town*

*Levon, Levon likes his money
He makes a lot they say
Spends his days counting
In a garage by the motorway*

*He was born a pauper to a pawn on a Christmas day
When the New York Times said, "God is dead
And the war's begun, Alvin' Tostig has a son today"*

Male, 23, Indonesian

Major partner in free association with [Faraby](#) (that's my puppet/secondary nation IRL).

From *The Diving Board* (2013)

*I put my life on hold and took you home
Good sense shot down I placed you on a throne
Where was the wheel that kept me on the road
The force of nature preventing overload*

*So don't you know I've been dressed to kill
If you got the tools be careful what you build
When the arrow's in the bull's-eye every time
It's hard assuming that the archer's blind*

*My quicksand
Let me introduce you
To my final stand
I went to Paris once
I thought I had a plan
I woke up with an accent
I wound up in quicksand
My quicksand*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
