Date: 02/30/2279 (lol)

Upon reaching Neptune's upper atmosphere after orbiting the sun once, Man's ship docks inside a larger ship, piloted by Gamaghizian of **გამაგიზიანი** (2051-). Gamaghizian then reveals that **გამაგიზიანი** has set up a base on Triton, and Man decides to live there. A hostile rover sent by [Abkhaz user] is also there; Gamaghizian fries some of its instruments with a laser module, causing it to glitch out and stop sending data...

Show Spoiler

Miku Mq'oroponi, not living up to her surname, then fires a bullet into one of the rover's gyroscopes. 285 damage, and the rover's movement becomes a lot more predictable.

Show Spoiler

Since they're not yet in the base, the ambient atmosphere is 0.007% of Earth's, and the **გამაგიზიანი** music is almost useless.
