Morbid Angel - *God Of Emptiness*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

'cause soon we'll face Our Lord - we leave this world behind!  
Free among the dead from sins we once plead.  
Eternal is our love - we leave this world behind.

Perfect song for the last of the day.
