The FBI agents incidentally spread this new variant of chicken pox all around the world, causing chaos, discord, turmoil, and death. Eventually, the vaccine is developed, but by then, billions of people are already dead (including the FBI agents), and anarchy has ensued around the globe.

New badass, chicken-pox immune post-apocalyptic survivor.

TEXAS - goodbye, everyone :)

Little did the entity that ordered the nuke launched know, another spacecraft's crew had anticipated this move beforehand.

<Aila> Ready? This is our chance to save Man.
<Celia> Target and trajectory confirmed, fire the interceptor missile!

The bomb is set off by an unexpected collision with the missile 450km above the planet's surface, drastically reducing the damage to Nation and making the bunker unnecessary.

New Man detonates a nuclear bomb in Times Square. Per his "curse", the bomb expired in 1959 and so all it did was rust instantaneously with no harm to the public
