Ensiferum - Blood is the Price of Glory

In other words — and this is the rock solid principle on which the whole of the Corporation's Galaxy-wide success is founded — their fundamental design flaws are completely hidden by their superficial design flaws.

we, unlike the bourgeoisie, have nothing to lose and therefore our expression will be the only honest one, our words will be the only challenging ones and our art will be the one revolutionary expression. We need new noise and new voices and new canvases to become something more than the last poets of a useless generation.

*Who is in control of those in control?*

[Why does Ben Lee \(who I assume is the linoleum faced 'wipe-clean-look' profile in the bottom right-hand corner\) look like Rene Auberjonois? Why would Odo be hanging around a rubbish looking holo-world full of quidditch goals that vaguely resembles rejected Final Fantasy 13 concept art? And what happened in order for him to want to breath tornados? And how?!... It would take a vaster intellect than mine in order to answer those questions.](#)

29:05 long great doom metal song. First track from their last album.

That songs even long compared to the longest songs I typically listen to, though I know one 29 minute one. There's another one I know that's 72 minutes long, but I haven't really listened to it.

I am listening to;  
Intro, by Boris. From Akuma No Uta. Very atmospheric.

We are a small group of semi-advanced religious telepaths. The people of Lehemad have evolved on their planet in various stages for over 75 000 000 earth years. The last religious wars ended 8000 earth years ago leaving the population at about 1 240 200 to 1 265 200 citizens. Most of the time past years were spent in closed isolation, since science-fields like direct space exploration and genetics were prohibited by the religion. The isolation with the past religious dogmas where abandoned after the spiritual leader achieved the 8th dimension enlightenment. The nation is now guided by "that thing that guides us" from the 8th dimension. The nation has finally engaged in genetics what has fueled a population boom, and began building a space fleet.
