Gansu officials who are in Xingjiangguo (now Tibet) somehow bring Gansu Lake to Sydney and destroy the city. Then they move it again to the middle of the Sahara Desert.

Turkey takes over Greece and collapses and all the previous states with their regular borders come out

The island of the Galapagos and the main power of South America controlling the West of South America. Militaristic and authoritarian with a troubled past and an uncertain future with stability at an all time low due to a lost war and unpopular occupiers.

With allies on Earth in the form of the Squirrel-Gerbil Alliance, and on Mars in the form of the Catgirl Polity, the Capuchin Polity resolves to increase its earth-side influence, as its joint colony in the Proxima Centauri system will take years to develop fully.

Their first target is the newly christened "Pirateville", those cruel enslavers of their brethren. The capuchin sends an ultimatum to the pirates, demanding that they end their criminal ways, as well as releasing all non-human primates kept as pets or for other reasons.

In the meantime, the Capuchin Polity prepares for a space-originating ground invasion. While the Polity has no official navy, it has a considerable space force and army. The first of their orbital bombers and killer satellites begin to aim their sights at the islands.

The pirates decline and as they did, they get massacred, with lots of injuries on both sides. Pirateville lost and now it's on the hands of the Capuchin Polity.

Okay so back to Bobland, so what happened? Oh they're now a popular tourist attraction now? Neat.

There are Swedish Fish on Epsilon Eridani and they join the Algerbil alliance. The capuchins might need to prepare for a joint invasion by the Laotian and Paraguayan navies, because of water scarcity. This knowledge was made known by the Boblandians.
