I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

The man's too strong - Dire Straits

Call me Sham

"Governments may think and say as they like, but force cannot be eliminated, and it is the only real and unanswerable power. We are told that the pen is mightier than the sword, but I know which of these weapons I would choose." Sir Adrian Paul Ghislain Carton de Wiart VC, KBE, CB, CMG, DSO.

Nationalism is an infantile disease, it is the measles of humanity.

This site stresses me out, so I rarely come on here anymore. I'll try to be civil and respectful towards those I'm debating on here. If you don't extend the same courtesy then I'll probably just ignore you.
